Education

Ph.D. in Computer Science

Aug 2019 - Current

Virginia Tech, GPA: 3.94/4.0

- **Thesis:** Designing Augmented Reality Virtual Displays for Productivity Work (Advisor: Doug Bowman)
- **Qualification:** Human-Computer Interaction (6/6 points awarded)

M.Sc. in Computer Science

Mar 2019

Pontifical Catholic University of Rio Grande do Sul (PUCRS), GPA: 9.32/10.0

- **Thesis:** 3D Modeling of Large Structures in Augmented Reality (Advisors: Marcio Pinho, Doug Bowman)

B.Eng. in Computer Engineering

Dec 2016

Pontifical Catholic University of Rio Grande do Sul (PUCRS), GPA: 8.82/10.0

- **Thesis:** Evaluating the Efficiency of an Ego-exocentric Technique for Cooperative Manipulation in Virtual Environments
- **Study abroad:** Illinois Institute of Technology (IIT), GPA: 3.87/4.0

Honors and Awards

2017 Academic Excellence fellowship recipient (2017-2018), from CAPES/PROEX

2016 Featured Student by the Brazilian Computer Society (SBC), with the highest GPA of class

2014 Brazil Scientific Mobility Program scholarship recipient (2014-2015), from CAPES

Research Experience

Microsoft Research - Interactive Media Group

Summer 2021

Research Intern

- Conducted user studies to understand the effects of replacing physical monitors with VR virtual monitors.
- Presented findings at the HCI Intern Talk Series and at an End of Internship Talk.
- Informed the design of software and hardware prototypes based on user study results.

Virginia Tech - 3DI Group

Aug 2019 - Current

Student and Graduate Research Assistant

- Designed a prototype for displaying virtual monitors on a Microsoft HoloLens 2, with the objective of conducting office work.
- Designed novel approaches for virtual displays that take advantage of AR characteristics to enhance usability and productivity.
- Conducted user studies to understand the impacts of extending or replacing physical monitors with virtual monitors in productivity situations.
- Led a team submission to the IEEE VR 3DUI Contest 2020 about immersive storytelling and increasing empathy towards people with disabilities through experience and embodiment.

PUCRS - GRV

Mar 2017 - Feb 2019

Student and Graduate Research Assistant

- Designed an AR application for situated modeling in architecture, using Unity 3D (C#) and Microsoft HoloLens.
- Evaluated approaches to 3D modeling when the environment geometry is unknown; results were published at ACM SUI 2019.
- Evaluated methods of interaction for an AR game with behavioral animation of virtual characters using iOS devices.
- Designed an application to remotely present slides from inside a virtual environment, which was used at PUCRS Health Tech.

Duke University - DiVE

May 2015 - Jul 2015

Research Scholar

- Designed a technique for using asymmetric viewpoints in cooperative object manipulation in virtual reality, using Unity 3D (C#), Oculus Rift, and UDP/IP network communication.
- Led the development team, and presented our solution at the IEEE 3DUI Contest 2016.

PUCRS - GRV

Apr 2012 - Dec 2016

Undergraduate Research Assistant

- Designed games for the Microsoft Kinect using XNA (C#) that were used by elderly people with mild cognitive impairment in a neurorehabilitation study.
- Designed and deployed an interface for 6 DOF tracking of a conductor's baton during a live orchestral performance.
- Developed an application for creating digital sculptures using handheld AR (Android/iOS).

Skills _____

Expertise Areas *Research, Augmented Reality, Virtual Reality, 3D User Interfaces, Human-Computer Interaction, User Studies*

Tools & Technologies *C#, Unity 3D, C, C++, OpenGL, OpenCV, Python, VB.net, Git, Windows APIs*

Activities and Service _____

- Student Member, IEEE Computer Society.
- Student Member, ACM.
- Student Member, Virginia Tech's Center for HCI.
- Reviewed submissions for IEEE VR, IEEE ISMAR, ACM CHI, etc.
